Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.		Applicant(s)				
	09/943,93	39	BOULEAU, CED	BOULEAU, CEDRIC K. R. H.			
Office Action Summary	Examiner		Art Unit				
		y) D Nguyen	2179				
The MAILING DATE of this communication Period for Reply	on appears on the	cover sheet with th	e correspondence a	ddress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
Status							
1)⊠ Responsive to communication(s) filed on	31 August 2001						
	This action is n						
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is							
closed in accordance with the practice ur	nder <i>Ex parte</i> Qu	<i>ayle</i> , 1935 C.D. 11,	453 O.G. 213.				
Disposition of Claims							
4) Claim(s) 1-48 is/are pending in the application.							
4a) Of the above claim(s) is/are withdrawn from consideration.							
5) Claim(s) is/are allowed.							
6)⊠ Claim(s) <u>1-48</u> is/are rejected.							
7) Claim(s) is/are objected to.							
8) Claim(s) are subject to restriction	and/or election r	equirement.					
Application Papers							
9) The specification is objected to by the Examiner.							
10)☐ The drawing(s) filed on is/are: a)☐ accepted or b)☐ objected to by the Examiner.							
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).							
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).							
11)☐ The oath or declaration is objected to by t	the Examiner. No	te the attached Offi	ice Action or form P	TO-152.			
Priority under 35 U.S.C. § 119							
12) ☐ Acknowledgment is made of a claim for for a) ☐ All b) ☐ Some * c) ☐ None of:		-	(a)-(d) or (f).				
1. Certified copies of the priority documents have been received.							
2. Certified copies of the priority documents have been received in Application No							
3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

Art Unit: 2179

DETAILED ACTION

Claim Objections

1. Claims 26 and 28-32 are objected to because of the following informalities:

As per claim 26, "IUI" at line 2 (page 49) should be changed to --UI--.

As per claims 28-32, they all should be dependent on claim 27 instead of claim 24.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Carroll, JR ("Carroll", US 2002/0085020).

As per independent claims 1, 18, 27, 33, 45, 47, and 48, Carroll teaches a computer implemented method and corresponding system for providing a user interface comprising the steps/means:

a UI view definition for a user interface (page 3, [0054] and fig. 22, page 14, [0270]); and

Art Unit: 2179

a UI view manager operable to dynamically generate the user interface from the UI view definition (page 5, [0167]), wherein the UI view manager instantiates a wrapped control as part of the user interface (page 3, [0059] and page 5, [0189]).

As per claim 2, which is dependent on claim 1, Carroll teaches the wrapped control comprises:

a control (page 7, [0214]), a wrapper (page 3, [0059]), and the UI view manager instantiates the wrapped control by providing the control as part of the user interface using the wrapper (page 12, [0256] – page 13, [0263]).

As per claim 3, which is dependent on claim 1, Carroll teaches the user interface comprises a plurality of controls, the wrapped control being one of the controls (e.g. fig. 19).

As per claims 4, 19, 28, 334, and 40, Carroll teaches the UI view manager is operable to dynamically add a new wrapped control to the user interface (page 7, [0212] and page 9, [0243]).

As per claims 5, 21, 30, 36, and 42, Carroll teaches the user interface includes a plurality of controls (e.g. fig. 19); and it is inherent in Carroll system that the UI view manager is operable to dynamically remove an existing control of the controls from the user interface using the GUI builder application (fig. 22).

Art Unit: 2179

As per claims 6, 20, 29, 35, and 42, Carroll teaches the UI view manager is operable to dynamically change a function of the wrapped control (page 9, [0244]).

As per claim 7, which is dependent on claim 1, it is inherent in Carroll's system to comprise a UI container, wherein the user interface is provided within an environment provided by the UI container.

As per claim 8, which is dependent on claim 1, Carroll teaches the UI view manager provides the wrapped control as part of the user interface by including a user interface element of the wrapped control in the user interface (page 7, [0210]).

As per claim 9, which is dependent on of claim 1, Carroll teaches the UI view manager instantiates the wrapped control as part of the user interface by:

providing functionality of the wrapped control to be performed in response to activating a user interface element of the wrapped control in the user interface (page 7, [0210] and page 12, [0256] – page 13, [0263]).

As per claim 10, which is dependent on claim 1, Carroll teaches the wrapped control comprises:

code to implement a control interface, wherein the implementation of the control interface enables the UI view manager to invoke some behavior of the wrapped control by

Art Unit: 2179

invoking methods of the implementation of the control interface (page 7, [0210] and page 12, [0256] – page 13, [0263]).

As per claim 11, which is dependent on claim 1, Carroll teaches the UI view manager contains an implementation of a UI view interface and the wrapped control invokes function of the UI view interface implementation of the UI view interface to communicate with the UI view manager (page 7, [0210] and page 12, [0256] – page 13, [0263]).

As per claim 12, which is dependent on claim 1, Carroll teaches the UI view manager is operable to dynamically generate the user interface in response to a change to the UI view definition (page 14, [0268]).

As per claim 13, which is dependent on claim 1, Carroll teaches:

a user interface designer for providing a UI view definition (page 8, [0236]).

As per claim 14, which is dependent on claim 1, Carroll teaches the UI view definition corresponds to an XML file (fig. 17).

As per claim 15, which is dependent on claim 1, Carroll teaches the UI view definition comprises a control definition for the wrapped control, wherein the control definition specifies a user interface element of the wrapped control and a program identifier of code to provide functionality of the wrapped control (page 9, [0243] and [0244]).

Art Unit: 2179

As per claims 16 and 17, Carroll teaches the UI view definition comprises a panel definition for a panel of the user interface, wherein the panel definition comprises a control definition for a control to be presented in the panel, wherein the control definition specifies a user interface element of the control and a program identifier of code to provide functionality of the control (page 13, [0264]).

As per claims 22, 23, 31, 32, 37, 38, 43, and 44, Carroll teaches:

sending a message to and receiving a message from the wrapped control via a control interface associated with the wrapper (page 8, [0220] and page 10, [0247]).

As per claim 24, which is dependent on claim 18, Carroll teaches creating a wrapper comprises implementing at least one function of a control interface (page 9, [0244]).

As per claim 25, which is dependent on claim 24, Carroll teaches the at least one function is a function to cause the control to load a property of the control from the UI view definition (fig. 13; pages 7 and 8, [0214]).

As per claim 26, which is dependent on claim 18, Carroll teaches:

generating a UI view manager by implementing at least one function of an UI view interface the function create a user interface panel for housing controls, a sixth function to create a user interface panel for adding a control to a user interface panel (page 13, [0264]).

Art Unit: 2179

As per independent claim 39, it is a combination of claims 1 and 12, therefore, it is rejected as set for in the rejection of claims 1 and 12, combined.

As per independent claim 46, it is a combination of claims 1 and 2; therefore, it is rejected as set for in the rejection of claims 1 and 2, combined.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5651108 A to Cain, Ronald Allen et al. discloses development system with methods for visual inheritance and improved object reusability.

US 20020063734 A1 to Khalfay, Afzal et al. discloses computer user interfaces that are generated as needed.

US 6515682 B1 to Washington, Jeff D. et al. discloses system and method for editing a control utilizing a preview window to view changes made to the control.

US 6185728 B1 to Hejlsberg, Anders discloses development system with methods for type-safe delegation of object events to event handlers of other objects.

US 6546297 B1 to Gaston, Michael T. et al. discloses distributed life cycle development tool for controls.

Art Unit: 2179

Inquiries

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nhon (Gary) D Nguyen whose telephone number is 703-305-8318 or (571)272-4139 (starting 10/20/2004). The examiner can normally be reached on Monday - Friday with every other Monday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather R Herndon can be reached on (703)308-5186 or (571)272-4136 (starting 10/20/2004). The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
